

# Games

[help.grandcare.com](http://help.grandcare.com) → help for caregivers → games

## Overview

Interactive systems come with four pre-set video games: Solitaire, Checkers, Mastermind, and Tic Tac Toe. To play the games, your loved one presses on the "Games" button on the Touchscreen Main Menu. The games are designed for your loved one to play against the computer.

## Adding Games

You can add games to the Games menu. If there are Internet games that your loved one would like to play, follow the instructions for adding websites to the system, and be sure to choose the "Games" category. Any websites added with the category set to "Games" will appear on the Touchscreen with other websites, but also on the Games menu.
